

Application No. 195: Mobile clothesline

Author: Marco Di Simone, Neapel, Italy

This clothesline can be attached and detached in no time

I'd like to share my idea with you: a clothes line that can be attached and detached in no time.

The first component is the set of two GRUNDTAL hangers (www.ikea.com/de/de/catalog/products/30061247) from IKEA. These hangers look much nicer than permanently mounted metal hooks.

Besides the hangers and its accessories I needed two metal inserts and two clamps, two rawlplugs and two metal screws (see photo).

For a clothesline a steel rope with plastic coating is suitable.

I mounted the hangers with rawlplugs and screws on the tiles on the left and the right over my bath tub.

Then I made loops at the ends of the steel rope, stabilised it with metal inserts and screwed it on tightly.

Then I just had to attach a magnetic hook (www.supermagnete.de/eng/FTN-20) to each hanger and hook up the steel rope.

This mobile clothesline holds 2 or 3 bath towels with no problem - therefore, it's not necessary to use larger magnetic hooks. And when you don't need the clothesline, just hide it in a drawer. Then you can use the pretty IKEA hangers for hanging up bath towels.
