

Application No. 315: Mobiles with magnetic bedding

Author: Ivan Black for Laikingland, Huddersfield, United Kingdom

Beautiful, almost frictionless wooden mobiles

Laikingland (www.laikingland.co.uk/) is a creative collaboration, based in both the UK and The Netherlands, whose intention is to design and manufacture beautifully crafted kinetic objects that engage and evoke a sense of play and nostalgia.

The newest coup of Laikingland are magnetic mobiles. They have three different kinds, each with a limit of 250 pieces.

The very light wooden parts of the mobile are bedded on magnetic spheres (www.supermagnete.de/eng/magnets.php?group=spheres) and held together with rod magnets (www.supermagnete.de/eng/S-03-06-N). Even a slight puff of air makes them start rotating around their own axes.
