

Application No. 34: Knife Block

Author: Mirko Motsch, Sankt Ingbert, Germany

Knives stick to this decorative knife block in every direction

I would like to present a magnet project in the form of a knife block.

It is made of two pieces of Padouk wood, each 5 cm thick (and approximately 25 x 25 cm wide) in which I embedded 24 magnets of the type S-15-08-N (www.supermagnete.de/eng/S-15-08-N) (per piece).

The magnets were placed in such a way that one can apply the knives as one likes.

The stand is made of rust-free stainless steel and the base is a piece of granite approximately 15 x 15 cm. The knife block can be turned 360 degrees and is 40 cm tall.

I hope you like my project and thank you again for the magnets that make such projects possible.

Note from the supermagnete team: two more interesting projects are "Knife board with base" (www.supermagnete.de/eng/project278) and "Knife ledge" (www.supermagnete.de/eng/project190).
