

## Application No. 42: Hanging Tools 1

Author: Kim Engrob, Spjald, Denmark

### An neat tool wall does not have to remain wishful thinking

Kim, from Denmark, has hung all of his tools using magnets. To do this, he simply made holes in a large piece of wood (244 x 122 cm) and glued magnets into the holes.

One must use a good glue for this purpose to ensure that the magnets cannot be pulled out in use, for instance UHU endfest ([www.supermagnete.de/eng/M-15](http://www.supermagnete.de/eng/M-15)).

For the various hammers, he used S-15-08-N ([www.supermagnete.de/eng/S-15-08-N](http://www.supermagnete.de/eng/S-15-08-N)), for the screw drivers S-08-03-N ([www.supermagnete.de/eng/S-08-03-N](http://www.supermagnete.de/eng/S-08-03-N)) and for most of the other tools the S-10-05-N ([www.supermagnete.de/eng/S-10-05-N](http://www.supermagnete.de/eng/S-10-05-N)).

We think this looks both practical and nicely organised!
