

Application No. 58: Mobile Note Pins

Author: Pierre Coulon, Vezelois, France, pcoulon@tele2.fr

Cute and original "memory joggers"

I'm happy to present to you this idea, which is very effective thanks to the super quality and strength of your super magnets. These memo pins are 'très funny' and can easily be made by children. They will certainly be full of pride when they can give these pins to friends and family at parties and birthdays.

First choose an attractive character, print or copy it, or use a drawing done by your child. I recommend a size of 5 to 7 cm, so you might need to reduce the size of the picture.

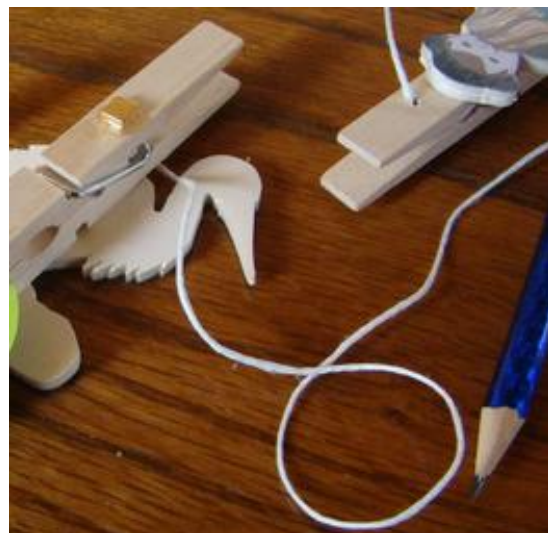

Then glue the character to a 3-4 mm thick piece of plywood.

Let it dry for 24 hours then cut it out using a jigsaw.

Then, take a clothes pin and drill a hole with a diameter of 1.5 mm into one side. Drill a second hole into the top of a pencil or pen. Connect the clothes pin and the pencil using a thin string (1 mm) and tie a knot on both ends of the string.

Use wood glue to fasten a figurine to the drilled half of the clothes pin, just below the hole. Use two-component adhesive (www.supermagnete.de/eng/M-15) to glue a small super magnet, for example a Q-05-05-02-G (www.supermagnete.de/eng/Q-05-05-02-G), to the backside of the other half of the clothes pin.

Now you have a memo clip which everybody will love, as I've learned at various Christmas markets!
