

Application No. 82: Construction Addiction

Author: Matthias, Zürich, Switzerland

How does that work with addictions - it all starts small and harmless...

How does that work with addictions...? It all starts small and harmless. And it's fun! And it gets more and more fun! And then, before you know it, you can no longer live without it ... it gets the upper-hand!

Matthias Hofer and his friend also started small. With just a small magnet set Z-05 (www.supermagnete.de/eng/Z-05), they began creating interesting patterns.

And not just in 2D but also in 3D.

Perhaps not always perfectly symmetrical.

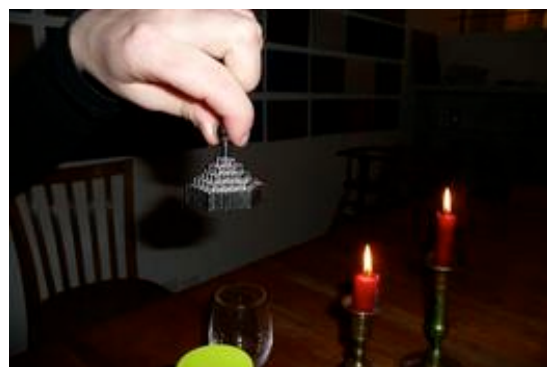

But for the observant definitely recognizable as numbers: 2008!

Free forms are also an interesting challenge.

Rotating sculptures are allowed as well.

But for Christmas we're going to get at least one more set!

(Note from the Editor: Here where it starts to go "overboard"...)

Not only are do eyes light up!

But the whole sculpture as well!

Relentlessly, the addiction forces us forward. Maybe a rotating sculpture would fit inside the next tower?

Well, anyway, there are worse addictions :-)

Note from the supermagnete team:
These magnets are not suitable for children! Please review our safety tips. (www.supermagnete.de/eng/safety.php).

Articles used

5 x Z-05 (no longer in the product line!)
