

Application No. 124: Simple bookmark

Find the right page in the book - without dog-ears

I use two small disc magnets S-03-01-N (www.supermagnete.de/eng/S-03-01-N) as a bookmark in my current book. The two are strong enough to separate a few pages, but nice and thin so they don't damage the book.

I find "normal" bookmarks annoying, because you can never find them when you need them. And in my opinion, the bad habit with the "dog-ear" should be punished with at least 500 hours community service.

At first, it takes some getting used to this type of bookmark, but you adapt to it in no time.
