

Application No. 305: Mobile Christmas ball ornaments

Author: Marie-Christine Bourdais, La Roche de Glun, France

That's how you accentuate your Christmas tree balls

I like to hang up many Christmas tree ball ornaments throughout the house. But I hate to have to hang them up with a string. My new system: I use disc magnets S-05-05-N (www.supermagnete.de/eng/S-05-05-N) to hang up the balls under a metal surface, in this case the kitchen lamp. That only works, of course, if the loop on top of the ball is made of iron.

Mounting them this way has the advantage that they sway at the slightest air movement and turn around the magnet. But so far, none of the balls have dropped because the magnets are so strong.

It's also great that I can take down the balls in no time and place them somewhere else.

Merry Christmas!

Note from the supermagnete team: A similar application with Christmas tree ball ornaments is the project "Christmas ball ornaments without tree" (www.supermagnete.de/eng/project244).

Articles used

S-05-05-N: Disc magnet Ø 5 mm, height 5 mm (www.supermagnete.de/eng/S-05-05-N)
