

Application No. 402: Magnetising brass keys

Author: Ewald Wachtendorf, Hude, Germany

How to easily magnetise any key

In order to attach brass keys (non-magnetic) to screws, nails, iron beams or pipes, drill a whole of 6 or 8 mm diameter into the key. Then put a suitable magnet into the whole, in this case a R-06-02-02-G (www.supermagnete.de/eng/R-06-02-02-G) ring magnet or a S-08-03-N (www.supermagnete.de/eng/S-08-03-N) disc magnet.

Now you can easily place keys in inconspicuous places and hide them from trespassers.

Articles used

S-08-03-N: Disc magnet Ø 8 mm, height 3 mm (www.supermagnete.de/eng/S-08-03-N)

R-06-02-02-G: Ring magnet Ø 6/2 mm, height 2 mm (www.supermagnete.de/eng/R-06-02-02-G)

R-06-02-02-N: Ring magnet Ø 6/2 mm, height 2 mm (www.supermagnete.de/eng/R-06-02-02-N)
