

Application No. 523: Folder on the whiteboard

Author: Abraham Gomez Gonzalez, Burgos, Spain

This hanger facilitates an easy paper presentation on a whiteboard

I am an engineer and work in an office. Often, I hold longer presentations on the whiteboard (www.supermagnete.de/eng/group/whiteboards) and I'd like to show some sheets of paper. That is rather difficult since space is limited next to the other notes. You can use magnets to hang up single sheets, but that becomes inconvenient quickly: You have to take down the first sheet to hang up the next, etc. That doesn't exactly help the flow of the presentation.

At one point, I had the idea to glue 4 Q-10-10-02-N (www.supermagnete.de/eng/Q-10-10-02-N) block magnets to the backside of a binder closure. I attached four rubber distance spacer to the corners so the whiteboard won't get scratched and the structure won't slide down.

adjusted binder closure

Now, I can use a whole bunch of paper for my presentations on the whiteboard (see picture below). The already shared sheets can be taken down or attached to the top of the board with another magnet.

This simple structure solved a major problem for me.
