

## Application No. 543: Board for magnet storage

Author: C.H., Lichtenstein/Sachsen, Germany

### How do I store all of my strong magnets?

If you frequently use different magnets, you get to the point where storage becomes an issue.

First option: Leave all magnets in the packaging that they were delivered in. That seems like a safe bet, but you don't really see the magnets when you need one and you're still determining which one would be most suitable. Also, it's almost a shame to keep magnets under wraps like that. They are beautiful after all :-)

Second option: Put all magnets on a table or shelf. But everyone who owns strong magnets knows that this is not a good idea.

Third (my) option: Make a special board to safely store your magnets!

### Material needed:

- Steel plate 600 x 300 mm, 2 mm thick
- Felt 600 x 300 mm, 5 mm thick
- 2 countersunk screws

### Assembly

I drilled two holes with a diameter of 5 mm into the metal plate and put a countersink in each of them. Then, I glued the felt on the side with the countersink. Now, I only had to screw two countersunk screws into the wall and hang up the plate.

Now, I can put my magnets on the felt.

The photo illustrates the mounting principle with a small piece of iron. In reality, I drilled and countersunk the big steel plate, of course.

Backside of the board

Here are the magnets shown in the photo:

- Piggy ([www.supermagnete.de/eng/ANI-02](http://www.supermagnete.de/eng/ANI-02))
- Hippo (sold out)
- S-15-08-N ([www.supermagnete.de/eng/S-15-08-N](http://www.supermagnete.de/eng/S-15-08-N))
- S-20-10-N ([www.supermagnete.de/eng/S-20-10-N](http://www.supermagnete.de/eng/S-20-10-N))
- Q-10-10-05-N ([www.supermagnete.de/eng/Q-10-10-05-N](http://www.supermagnete.de/eng/Q-10-10-05-N))
- Q-15-15-08-N ([www.supermagnete.de/eng/Q-15-15-08-N](http://www.supermagnete.de/eng/Q-15-15-08-N))
- Q-20-20-10-N ([www.supermagnete.de/eng/Q-20-20-10-N](http://www.supermagnete.de/eng/Q-20-20-10-N))
- W-12-N ([www.supermagnete.de/eng/W-12-N](http://www.supermagnete.de/eng/W-12-N))
- K-10-C ([www.supermagnete.de/eng/K-10-C](http://www.supermagnete.de/eng/K-10-C))
- K-19-C ([www.supermagnete.de/eng/K-19-C](http://www.supermagnete.de/eng/K-19-C))

The memo holders need to be stabilised on blocks, so they won't fall off.

All magnets stick well to the 2 mm of steel and 5 mm of felt. However, you can easily remove them from the board.

**Note from the supermagnete team:** Of course, you can also put your magnets directly on a steel plate (without felt), but then they are less protected and harder to remove.

In our online shop, you can also find colourful magnetic boards ([www.supermagnete.de/eng/group/magnetboards](http://www.supermagnete.de/eng/group/magnetboards)) which are great surfaces for you to attach your magnets.

Discover magnetic boards ([www.supermagnete.de/eng/group/magnetboards](http://www.supermagnete.de/eng/group/magnetboards))
