

Application No. 730: Magnetic lampshades

Author: Samathey, France

Shiny sea urchins

Hand-made lamp

I sell this hand-made light in various interior decoration stores. Without your magnets I wouldn't have been able to put it together.

Magnet use

The porcelain sea urchins only stay on the thin steel discs because they are held in place by tiny 3 x 3 mm neodymium magnets (www.supermagnete.de/eng/S-03-03-N). For one lamp I implement a total of 27 disc magnets.

Attaching the magnets

I use UHU MAX REPAIR (www.supermagnete.de/eng/WS-ADH-01) to attach the magnets.

The completed lamp

Here you can see the finished lamp turned on at night.

Attention - humidity!

Please note that neodymium magnets are not suitable for use in humid areas (www.supermagnete.de/eng/faq/outdoor) and need to be insulated.
