

Application No. 777: Soundproofing with egg cartons

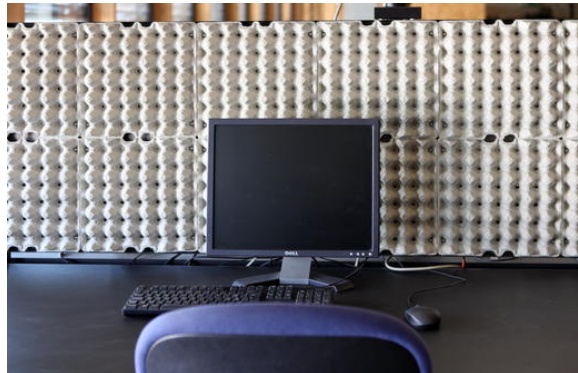

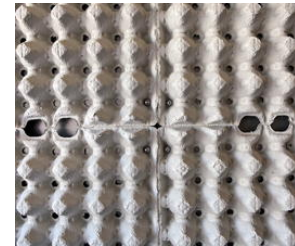

Author: Metall Werk Zürich AG, Zürich, Switzerland

A great solution for noisy open-plan offices

We installed an ecological and very cost-effective soundproofing in our company's newly designed open-plan offices: We covered large areas with egg cartons that were attached to the metal cubicle walls with strong sphere magnets Ø 10 mm (www.supermagnete.de/eng/K-10-C).

The soundproofing material are cheap 30-piece egg cartons. Each carton was discreetly attached with 4 sphere magnets (one in each corner).
