

Application No. 798: Upside down train

Author: DAS VERRÜCKTE HAUS, Egestorf, Germany

In the "crazy house" even the train rides upside down

The crazy houses

We are the inventors and builders of the CRAZY HOUSES (www.dasverruecktehaus-bispingen.de/). A real house in which all furniture and accessories are upside down! How crazy!

Attraction: Upside down train

In order to add a new attraction for our visitors, I had the idea of letting a model railway ride upside down on the ceiling. For that purpose I purchased strong cube magnets at supermagnete.de.

After a few setbacks, train crashes and subsequent modifications I reached my goal.

The principle

A track prepared with 12 mm cube magnets (www.supermagnete.de/eng/W-12-N) on the upper side of the structure pulls the train around in a circle.

The model railway is kept on the track with cube magnets that are attached to the bottom side of the train.

Caution: There is a protection of utility patents on this application!
