

Application No. 805: Christmas decoration with magnetic sheets

Author: supermagnete, Uster, Switzerland, support@supermagnete.com

Create your own magnetic Christmas decoration with magnetic sheets!

Materials needed

- Magnetic sheet (www.supermagnete.de/eng/MS-A4) in different colours (here gold, silver and green)
- Pencil and eraser
- Sharp scissors or cutter
- Paper/cardboard template (see below)
- Ruler

Instructions

Cut paper or cardboard templates (can be found in arts & crafts books or the Internet).

Tip: For an Internet search enter "stars", "angel", "Christmas tree" and "template" for quick results.

Place one template on the magnetic sheet and trace it carefully. Then cut it out.

Tip 1: If you want to cut out multiple stars, a cardboard template works better.

Tip 2: You can also use cookie cutters as templates. Just place the shape on the sheet and trace it with a pencil.

You can also draw shapes on the sheet. Try a Christmas tree for instance.

Use a ruler and measure picture frames for photos. Make sure the inner edge is a little smaller, so the photo doesn't fall out.

At the end, just remove pencil traces with an eraser.

And there you have your own magnetic, festive Christmas decoration for the fridge, whiteboard, magnetic board, metal cupboard, etc.

Buy coloured magnetic sheet now (www.supermagnete.de/eng/MS-A4)

We put together a whole collection of Christmas-themed customer applications:
