

Application No. 827: Cat mansion

Author: Francesco Sebastiani, Gubbio, Italy

A new home for stray cats

Extraordinary cat mansion

There have always been many stray cats hanging around my store. Since I have a soft spot for strays, I built for them a little mansion on a wooden pallet, designed after a monument in my city (Palazzo dei Consoli di Gubbio). It contains 13 separate units (single rooms) that are held together with magnets, which allows me to easily assemble and disassemble the construct.

As you can see, the mansion is already occupied!

Magnets for assembly

The waterproof rubberised magnets Ø 22 mm (www.supermagnete.de/eng/S-20-10-R), which hold together the individual units on the inside, passed the test of winter and summer (snow, wind, storms, and sun at 38 degrees!).

I also used some small block magnets to be able to easily open and close the doors. Below a few impressions of the assembly of the cat mansion.

Note from the supermagnete team: Animals are also dear to some of our other customers' hearts and they used magnets for their ideas as well:

Go to magnet applications for animals (www.supermagnete.de/eng/projects/animal)

Articles used

S-20-10-R: Disc magnet rubber coated Ø 22 mm, height 11,4 mm (www.supermagnete.de/eng/S-20-10-R)

Q-10-10-03-N: Block magnet 10 x 10 x 3 mm (www.supermagnete.de/eng/Q-10-10-03-N)
